

NEKTON-Pro-Active

Support for the musculoskeletal
system of dogs and cats

NEKTON[®]
PRODUKTE
...tierisch gut!

NEKTON-Pro-Active helps to develop

- Structure
- Function
- Strength of joint cartilage

All of the animal's joints are protected, supported and mobilized. Today, our dogs and cats are exposed to different stresses than they are in nature. Living indoors, not being fed correctly, lack of exercise and questionable breeding goals evidently encourage a number of musculoskeletal disorders.

The combination of the joint building blocks

- Glucosamine
- Chondroitin
- MSM

have been very successful for treating joint pain in humans and is now also being applied to pets.

The foundation stone for healthy skeletal development in young pets can already be laid when rearing puppies and kittens, by means of suitable diet and the moderate addition of vitamin and mineral compounds (**NEKTON-Dog-VM / NEKTON-Cat-VM**).

Healthy dogs and cats, especially from the middle age of life, profit from the preventive support by administering **NEKTON-Pro-Active** so that serious damage does not have to occur in the first place.

Statement of ingredients:

Glucosamine potassium sulfate (36 %), Chondroitin sodium sulfate (29 %), Calcium carbonate, Methsulfonylemethane (MSM) (6 %)

Analytical components:

Crude protein 10.3 %, crude fat 0.5 %, crude ash 40.6 % crude fiber 0.3 %

Guaranteed Analysis per kg: 149 mg Manganese (manganese(II)-sulfate, monohydrate)

Advantages:

- **NEKTON-Pro-Active** gives support to the animals' joints, so that they can experience everyday preferably without pain.
- Suitable for already impaired animals (for example with arthrosis) to improve their state of health.

Please note:

The full effectiveness of **NEKTON-Pro-Active** will develop after approx. 14 days of uninterrupted use. **NEKTON-Pro-Active** is not medication and is suitable for long-term administration.

Available in sizes: 100 g, 250 g

Feeding recommendation:

As a preventative (daily)

- Body weight up to 4 kg 0.5 g of NEKTON-Pro-Active
- Body weight 4 - 8 kg 1 g of NEKTON-Pro-Active
- Body weight 8 - 24 kg 3 g of NEKTON-Pro-Active
- From 24 kg body weight 4 g of NEKTON-Pro-Active

The daily dosage should be doubled for pets that are already suffering from illness.
