NEKTON-Fly

Multivitamin supplement for active birds

NEKTON® 1978
PRODUKTE
...tierisch gut!

NEKTON-Fly is specially attuned to the needs of active birds to build up enough strength and energy reserves for flying and laying performance.

NEKTON-Fly encourages growth, efficiency, fertility and laying performance to a high extent and positively influences metabolic processes.

NEKTON-Fly can be administered easily via the drinking water or mixed in with soft feed. Ideal in combination with the **NEKTON-MSA** (mineral compound).

NEKTON-Fly has proved to be excellent in supporting the treatment of diseases, i.e. when antibiotics, sulfonamides, etc. are given; because increased vitamins should be absolutely supplied when administering drugs, to counteract destruction of the intestinal flora.

Furthermore, **NEKTON-Fly** also contains calcium which is important for healthy bone formation, for eggshell development and for growth, especially in young animals. Trace elements and a sufficient amount of minerals are also contained in **NEKTON-Fly**.

Please note: No other vitamin compound should be administered while using **NEKTON-Fly.**

Available sizes: 75 g, 150 g, 600 g

Contains 2 amino acids.
Statement of ingredients:
Dextrose, calcium carbonate
Guaranteed analysis per kg:
6,600,000 IU vitamin A, 10,000 IU vitamin D3, 13,265 mg vitamin E (all-rac-alpha-tocopherylacetate), 665 mg vitamin B1 (thiamine hydrochloride), 1,680 mg vitamin B2 (riboflavin), 3,330 mg calcium-d-pantothenate, 10,000 mg niacinamide, 665 mg vitamin B6 (pyridoxine hydrochloride), 224 mg folic acid, 2,000 µg vitamin B12 (cyanocobalamine), 16,660 mg vitamin C (L-ascorbic acid), 1,330 mg vitamin K3 (menadione-sodiumbisulfit), 50,000 µg biotin, 2,500 mg iron (ferrous(II)-sulfate, monohydrate), 1,220 mg zinc (zinc sulfate, monohydrate), 1,250 mg manganese (manganese(II)-sulfate, monohydrate), 200 mg copper (cupric(II)-sulfate, pentahydrate), 100 mg iodine (calcium iodate, free of water)
Technological additive: Silicic acid

Feeding recommendation:

1 g (= 1 measuring spoon) of **NEKTON-Fly** in 250 ml drinking water or 100 g soft food. The dosage can be quite safely doubled for a short time in stressful situations, such as breeding, molting, flight show, transportation, etc.
